

GENERAL CERTIFICATE OF EDUCATION BOARD

General Certificate of Education Examination

JUNE 2026

ORDINARY LEVEL

Centre Number	
Centre Name	
Candidate Identification Number	
Candidate Name	

Mobile phones are NOT allowed in the examination room.

MULTIPLE CHOICE QUESTION PAPER

Duration: One and a Half Hours

INSTRUCTIONS TO CANDIDATES

Read the following instructions carefully before you start answering the questions in this paper. Make sure you have a soft HB pencil and an eraser for this examination.

1. USE A SOFT HB PENCIL THROUGHOUT THE EXAMINATION.
2. DO NOT OPEN THIS BOOKLET UNTIL YOU ARE TOLD TO DO SO.

Before the examination begins:

3. Check that this question booklet is headed "Ordinary Level – 0510 Biology 1".
4. Fill in the information required in the spaces above.
5. Fill in the information required in the spaces provided on the answer sheet using your HB pencil: Candidate Name, Exam Session, Subject Code and Candidate Identification Number.
Take care that you do not crease or fold the answer sheet or make any marks on it other than those asked for in these instructions.

How to answer the questions in this examination

6. Answer **ALL** the **50** questions in this Examination. All questions carry equal marks.
7. Non-programmable Calculators are allowed.
8. Each question has FOUR suggested answers: A, B, C and D. Decide which answer is appropriate. Find the number of the question on the Answer Sheet and draw a horizontal line across the letter to join the square brackets for the answer you have chosen.

For example, if C is your correct answer, mark C as shown below:

[A] [B] [C] [D]

9. Mark only one answer for each question. If you mark more than one answer, you will score a zero for that question. If you change your mind about an answer, erase the first mark carefully, then mark your new answer.
10. Avoid spending too much time on any one question. If you find a question difficult, move on to the next question. You can come back to this question later.
11. Do all your rough work in this booklet using the blank spaces in the question booklet.
12. **At the end of the examination, the invigilator shall collect the answer sheet first and then the question booklet. DO NOT ATTEMPT TO LEAVE THE EXAMINATION HALL WITH IT.**

SECTION I

Questions 1-7

(Seven questions)

Directions: Each of these questions or incomplete statements is followed by four suggested answers. Select the best answer in each case and mark the answer sheet appropriately.

1. The point of attachment of the leaf to the stem is the:
 - A Internode.
 - B Node.
 - C Axil.
 - D Apex.

2. The contractile vacuole in *Amoeba* helps in:
 - A Reproduction.
 - B Movement.
 - C Feeding.
 - D Osmoregulation.

3. Choose the correct order of events in the Nitrogen Cycle.
 - A Nitrogen In the air → Animals get Nitrogen from plants → Bacteria fix Nitrogen → Animals die and decompose
 - B Animals die and decompose → Animals get Nitrogen from plants → Nitrogen In the air → Bacteria fix Nitrogen
 - C Bacteria fix Nitrogen → Nitrogen In the air → Animals get Nitrogen from plants → Animals die and decompose
 - D Nitrogen In the air → Bacteria fix Nitrogen → Animals get Nitrogen from plants → Animals die and decompose

4. A solution obtained from crushed germinating bean seeds was tested with Million's reagent and a red colour was observed. This indicates the presence of:
 - A Proteins.
 - B Starch.
 - C Reducing sugar.
 - D Lipids.

5. Which part of the alimentary canal produces bile?
 - A Duodenum.
 - B Liver.
 - C Gall bladder.
 - D Stomach.

6. Which layer of the skin produces melanin?
 - A Cornified layer.
 - B Malpighian layer.
 - C Granular layer.
 - D Subcutaneous layer.

7. What structure protects the lizard's body from mechanical injury?
 - A Scales.
 - B Tail.
 - C Head.
 - D Claws.

SECTION II

Questions 8-20

(Thirteen questions)

Directions: This group of questions relates to biological diagrams. Select the best answer for each question.

8. The diagram below is that of a plant cell.

Which of the numbered structures contain chlorophyll?

- A 1.
 - B 2.
 - C 3.
 - D 4.
-
9. The part of the eye responsible for image formation is the:
 - A Cornea.
 - B Pupil.
 - C Retina.
 - D Choroid.

10. Below is a presentation of the water cycle.

Which of the following processes is represented by 3?

- A Guttation.
B Precipitation.
C Absorption.
D Evaporation.
11. Which structure prevents the back flow of blood into the right atrium?
- A Semi-lunar valve.
B Tendon supporting valve.
C Bicuspid valve.
D Tricuspid valve.
12. This structure is responsible for forward movement in the bony fish.
- A Pectoral fin.
B Pelvic fin.
C Dorsal fin.
D Tail fin.

13. Which part of the female reproductive system is the site for implantation of the embryo?
- A Oviduct.
B Vagina.
C Cervix.
D Uterus.

14. The diagram below shows the position of endocrine glands.

Which of the numbered structure secretes a hormone that controls ovulation in females?

- A 1.
B 4.
C 2.
D 5.

15. It reduces friction during the movement of the elbow joint.
- A Cartilage.
B Ligaments.
C Tendons.
D Humerus.

16. The structure of a nerve cell that conducts impulses away from the cell body:
- A Axon.
B Dendron.
C Dendrites.
D Myelin sheath.

17. The blood vessel most likely to contain food nutrients a few hours after eating a heavy meal:
- A Hepatic portal vein.
B Hepatic artery.
C Renal vein.
D Aorta.

18. The structure in *Spirogyra* that enables it to carry out autotrophic nutrition:
- A Pyrenoid.
B Chloroplast.
C Mucilage.
D Cytoplasmic strand.

19. Which of the following structure is involved in gaseous exchange in the lungs?
- A Trachea.
B Bronchus.
C Bronchiole.
D Alveolus.

20. From the food chain below, what trophic level is occupied by the goat?

Sun → maize → goat → lion

- A Producer.
B Decomposer.
C Primary consumer.
D Secondary consumer.

Turn Over

SECTION III
Questions 11-25
(Five questions)

Directions: For each of the questions below, ONE or MORE of the response(s) is (are) correct. Decide which of the response(s) is (are) correct. Then choose:

A	If 1, 2 and 3 are all correct.
B	If 1 and 2 only are correct.
C	If 2 and 3 only are correct.
D	If 1 only is correct.

21. In a food chain:
- Producers are autotrophic organisms.
 - Each organism has many food sources.
 - Producers release carbon dioxide during photosynthesis.

22. During the bending movement of the arm:
- The biceps muscles contract.
 - The triceps muscles relax.
 - The ulna and radius straighten.

23. Myopia (short sightedness):
- Occurs as a result of the eyeball being large.
 - Near objects are seen clearly.
 - Is corrected with the use of concave lenses.

24. In temperature control during overheating:
- Sweating is inhibited.
 - Vasodilation occurs.
 - The hair erector muscles relax.

25. Birds fly easily because:
- They have wings.
 - They have hollow bones.
 - They have streamline bodies.

SECTION IV
Questions 26-30
(Five Questions)

Directions: Each of the following questions consists of a statement in the left-hand column followed by a second statement in the right-hand column. Choose your answer, A, B, C, or D as explained in the table below.

	First statement	Second statement	2 nd statement is a correct explanation of the first.
A	True	True	2 nd statement is a correct explanation of the first.
B	True	True	2 nd statement is NOT a correct explanation of the first.
C	True	False	
D	False	True	

- | First statement | Second statement |
|---|--|
| 26. During anaerobic respiration, glucose is partially broken down. | Anaerobic respiration occurs in the cytoplasm. |
| 27. Arteries have small lumen and thick elastic walls. | Arteries carry blood away from the heart. |
| 28. Fresh water Amoeba possesses contractile vacuole. | The cytoplasm of fresh water Amoeba is more concentrated than the surrounding water. |
| 29. Acid rain results when Sulphur dioxide and nitrogen dioxide are released into the atmosphere. | Sulphur dioxide and nitrogen dioxide in the atmosphere originate from the burning of fuel. |
| 30. The body of most mammals is covered with fur or hair. | Fur or hair assist in the control of body temperature. |

SECTION V
Questions 31–40
(Ten questions)

Directions: Each question consists of four lettered headings A, B, C, D. Select the heading which is closely related to the description which follows.

31. The process that releases carbon dioxide into the atmosphere:
- A Photosynthesis.
 - B Chemosynthesis.
 - C Respiration.
 - D Precipitation.
-
32. Controls balance and posture:
- A Cerebrum.
 - B Cerebellum.
 - C Hypothalamus.
 - D Medulla oblongata.
-
33. A pair of non-identical genes for the same characteristics:
- A Phenotype.
 - B Genotype.
 - C Homozygous.
 - D Heterozygous.
-
34. An association between two organisms in which both benefit.
- A Parasitism.
 - B Saprophytism.
 - C Mutualism.
 - D Predation.
-
35. A natural self-sustaining unit.
- A Ecology.
 - B Environment.
 - C Atmosphere.
 - D Ecosystem.
-
36. Produced during fright.
- A Insulin.
 - B Glucagon.
 - C Thyroxine.
 - D Adrenaline.
-

37. Causes malaria.
- A Plasmodium.
 - B Female anopheles mosquito.
 - C Culex.
 - D Male anopheles mosquito.
-

38. Its deficiency will lead to anaemia.
- A Phosphorus.
 - B Calcium.
 - C Iron.
 - D Iodine.
-

39. Used for tearing of flesh.
- A Incisor.
 - B Canine.
 - C Premolar.
 - D Molar.
-

40. Is an air pollutant.
- A Lead particles.
 - B Nitrogen gas.
 - C Mercury.
 - D Oxygen.
-

SECTION VI
Questions 41–50
(Ten questions)

Directions: This group of questions deals with biological situations. Each situation is followed by a set of questions. Select the best answer for each question.

41. When red blood corpuscles were mounted in distilled water for 20 minutes, only cell fragments remained in solution. This is due to:
- A Wilting.
 - B Osmosis.
 - C Turgidity.
 - D Plasmolysis.
-
42. In many perennial plants, soluble products of photosynthesis are transported from the leaves to underground storage organs. This is possible through:
- A Root pressure.
 - B Transpiration stream.
 - C Translocation.
 - D Active transport.
-

43. Two sets of apparatus were used to investigate the process of photosynthesis. Before the set ups were exposed to sunlight, both plants were kept in the dark for 48 hours. What colour change is observed when iodine is used to test for starch in the leaves?

A Orange.
B Dark blue.
C Deep red.
D Dark green.

44. In an investigation of the effects of external factors on body temperature of various animals, the following results were shown graphically.

From the graph above, the rat is described as:

A An exothermic animal.
B An ectothermic animal.
C A homeothermic animal.
D A poikilothermic animal.

45. The table below shows the composition of four different foods.

Food	Carbohydrates (g)	Fat (g)	Proteins (g)	Iron (mg)	Calcium (mg)
H	4.8	3.5	2.7	0.01	10.5
P	4.0	5.2	2.5	1.5	0.9
S	5.0	0.2	1.6	0.25	2.8
R	8.0	0.1	2.4	0.05	0.7

Which food will best prevent anaemia?

A P
B S
C R
D H

46. In rabbits, albinism (white fur and pink eyes) represented by 'a' is recessive to black fur colour and black eyes represented by 'A'. An albino male is crossed with a pure breeding black female. What is the probability of producing a normal F_2 offspring?

A $1/4$.
B $1/2$.
C $3/4$.
D 1.

47. A fish suffocates and dies if taken out of water. This is due to the fact that:

A Gills are airtight.
B Gills stick to each other.
C There is little oxygen in the air than water.
D There is much carbon dioxide in the air than in water.

48. The graph below shows the effect of temperature on the rate of photosynthesis.

What is the significance of point X on the graph?

A Minimum rate of photosynthesis.
B Maximum rate of photosynthesis.
C Reduction in the rate of photosynthesis.
D Stable rate of photosynthesis.

- 49.

		Donor Blood group			
Recipient Blood group	A	✓	X	X	✓
	B	X	✓	X	✓
	AB	✓	✓	✓	✓
	O	X	X	X	✓

From the table above, which Blood group is a universal donor?

A Blood group A.
B Blood group B.
C Blood group AB.
D Blood group O.

50. The table below shows the predator/prey relationship over a five (5) year period.

Year	1	2	3	4	5
Predator	3	6	10	5	3
Prey	500	475	300	100	30

Why does the population of predators drop by the fifth year?

A Competition for space.
B Too many prey to feed on.
C Lack of enough prey to feed on.
D Older predators present.
